Supply Chain Assessment

2008-2012

August 2008

New Supply Chain Assessment from BTM Consult ApS

Titel: *Supply Chain Assessment 2008-2012, August 2008*

List of content

Tables

Figures

Preface

Executive summary

1. Wind power market status

1.1 Wind power market at end 2007

1.2 Market forecast up to 2012

1.3 Comments on the forecast

2. Wind turbine suppliers: status and capacities

2.1 Actual output in 2007

2.2 Estimate of supply side development in 2008

3. The wind power industry supply chain

3.1 Introduction to the Supply Chain

3.1.1 Scope of the supply chain assessment

3.1.2 Geographical limitation

3.1.3 Current supply mode in wind industry supply chain

4. Supply chain assessment of key components

4.1 Blades

4.2 Gearboxes

4.3 Generators

4.4 Bearings

4.5 Power converters

4.6 Transformers

4.7 Summary of component supply status

5. Supply chain assessment of key materials

5.1 Castings

5.2 Forgings

5.3 Reinforcement fibres

5.4 Resins

5.5 Summary of key materials supply status

6. Tendency in wind power market

6.1 Political aspect

6.2 Industrial aspect

6.3 Strategic changes in sourcing patterns

6.4 Consolidation in the wind industry

7. Conclusions

8. Appendices

Appendix 1: Identified global supply capacity of **castings** for wind turbines.

Appendix 2: Identified global supply capacity of **forged material** for wind turbines

Appendix 3: Identified global supply capacity of **blades** for wind turbines

Note: The report is about 70 pages with some 40 tables and graphs.
