November 2008

Dear Wind Energy Professional,

During more than a decade The International Wind Power Markets have agreed that –

**BTM CONSULT ApS**  
***Are The premier forecasters of the international wind industry.***

From no other source will you receive more in-depth and accurate information from the worlds fastest growing power industry, **global wind power**.

In today's overload of information and with reports covering the Chinese market being introduced almost every week it is of greatest importance for the global wind decision makers to get the most valuable, precise and effective information about the Chinese Market form the wind industry's premier source – **BTM CONSULT ApS**.

Therefore, we are proud to introduce you to our latest report from BTM Consult ApS:

## **Made in China**

BTM Consult presents the latest in depth market study of the complex and at the same time very promising and opportunistic Chinese wind energy market. This BTM research of the Chinese market has been ongoing for more than a year with the latest key information from our attendance to GLOBAL WIND POWER 2008, Beijing 29<sup>th</sup> – 31<sup>st</sup> of October, 2008.

In the middle of the financial crises the Chinese market is still striving ahead with investments in wind energy in order to make an important part of making the Chinese energy market cleaner and to be in the leading group of countries fighting against the Global Climate Change through modern power generating facilities.

The BTM report: **Made in China** take focus on the following areas:

- the details of polices, regulations and incentives relevant directly to wind power
- the market and the players the local and the foreign in the demand side,
- the manufacturers of the wind turbine generators. The local, the JV, and the foreign players
- the breakthrough of supply chain bottleneck by 120 domestic sub suppliers and their capacities
- the ongoing relationship between the key components suppliers and 30 domestic WTG OEMs
- the performance of the operational capacity in 12 provinces
- the key investment condition both for local and foreign project developers.
- the market, the status and forecast ahead at a target of 80-100 GW installed capacity by 2020

In the light of political will and positive public attitude against the use of wind energy the market is booming and it will give a transformation of the whole wind energy picture in terms of new turbine manufacturers and component suppliers.

In summary, **Made in China** from BTM-C will lead your way to a better understanding of this very interesting and progressive market.

Secure your report now !.
